1. SHAREPOINT SITE ARCHITECTURE

1.1 Site Hierarchy

Table 1.1: SharePoint Site Structure

Level	Component Name	Type	Description
Root	FWD IT Hub	Hub Site	Central navigation and governance point
1.1	Knowledge Base	Primary Content Site	Main IT documentation repository
1.1.1	How-To Guides	Document Library	Step-by-step instructional articles
1.1.2	Troubleshooting Articles	Document Library	Problem-resolution guides
1.1.3	Policy Documents	Document Library	IT policies and procedures
1.2	Team Collaboration Sites	Collaboration Hub	IT team workspaces
1.2.1	Help Desk Operations	Team Site	Ticket management and procedures
1.2.2	Infrastructure Team	Team Site	Network and server documentation

Level	Component Name	Type	Description
1.2.3	Security & Compliance	Team Site	Security incident response
1.3	Administrative Areas	Governance Sites	Backend management tools
1.3.1	Content Governance	Admin Site	Metadata and approval workflows
1.3.2	Analytics & Reporting	Admin Site	Usage metrics and dashboards

1.2 URL Structure Best Practices

Table 1.2: URL Naming Conventions

Requirement	Example	Rationale
Use hyphens, not underscores	password-reset-guide ✓	Better search engine compatibility
Include key search terms	wifi-setup-corporate ✓	Improves internal search results
Keep under 60 characters	outlook-sync-issues ✓	Ensures readability and mobile compatibility
Use lowercase only	teams-installation ✓	Prevents case-sensitivity issues
Avoid special characters	No: ! @ # $ % ^ & *	Prevents URL encoding errors
No spaces	new-device-setup ✓	Spaces convert to %20 in URLs

Important Note: URLs cannot be changed after page publication without breaking existing links. Always draft in staging environment first.
